

Green Light is a privately owned business founded in early 2007. Headquartered in Sydney with offices in Canberra, Perth, Melbourne, Singapore and Hong Kong; Green Light has coverage in Australia, New Zealand, UK, Europe and Asia.

We deliver great outcomes that empower our customers and allow them to prosper

Since the beginning, we have demonstrated consistent and substantial growth to become a major on-shore provider of IT services to systems integrators, telcos, consultancies and defence organisations in a global market. We operate on a partner only model and are vendor neutral. Our approach to providing services as a partner is a unique model, one which we pride ourselves on offering. This unique approach means that we 100% white-label our services and never compete for work with your end client.

We provide end-to-end services, helping our clients succeed with outsourced or multi-sourced services. Green Light's service lines offer an agile scale up/scale down IT capability that allows our customers to bid for, win and complete IT projects in a cost competitive manner – without having to maintain expensive benches of personnel themselves.

Additionally, we provide the platform for our customers to better utilise their key talent in more senior and value-add roles in their businesses – as we are a safe pair of hands to complete tasks at the operational and delivery level. It is this level of service that has led Green Light to receive a BRW Fast 100 Award, identified as one of the fastest growing IT organisations in Australia.

Our Mission

To protect corporate and personal brands by optimising data security by working with our trusted partners to implement cyber security strategies that create mature, resilient organisations making risk conscious decisions in full possession of the facts.

Our Core Capabilities

- › Advisory Services
